Name: Hritvi Narvekar Roll no: 24102C0073 CMPN C TE

Assignment – 0		
COURSE INSIGHTS		
Q. No.		Details
Q.1	1a	How many buckets are there in VIT autonomous curriculum (syllabus)?
		The exact number of buckets is 5.
	1b	In which bucket is this course (subject) included?
		This course is included under the HSSM (Humanities and Social Sciences & Management) bucket. It is offered as a Core Course (as per NBA) titled E-Waste & Environmental Management (Subject Code: VEC02) for Semester V.
	1c	How many credits need to be completed from this Bucket?
		The total number of required credits for this bucket is not mentioned in the documentation and requires validation via the syllabus details or Academic Coordinator
	1d	How many credits from this bucket have you completed till now i.e. at the end of last semester?
		Till now 19 Credits Completed.
	1e	How many credits does this course have?
		The course E-Waste & Environmental Management (VEC02) is assigned a total of 2 credits. It has a Teaching Scheme of 2 Theory hours and 2 Tutorial hours per week, with 2 Theory credits and no Practical or Tutorial credits.
Q.2	2a	Have you gone through the curriculum of your course?
		Yes.
	2b	Is there a pre-requisite of this course?
		Yes. The prerequisite for this course is Environmental Science studied at the 12th standard level.
	2c	If yes, do you clearly remember the concepts of the pre-requisite course?
		Yes. I remember the basic concepts of Environmental Science, including environmental pollution, ecosystems, biodiversity, waste management, natural resources, and sustainable development, which provide the foundation for understanding E-Waste & Environmental Management.

	2d	Pl. mention the preparations you will need to do for this course e.g. revising which earlier course/s, software installations etc..
		To prepare for this course, I will revise the basic concepts of Environmental Science, including environmental pollution, waste management, sustainable development, and environmental protection.
	2e	List the names of future course/s, if any, which build on this course i.e. this course is their Pre-requisite.
		The future courses that build on this subject are: Environmental Management (Semester VII or VIII) Sustainability Management (Semester VII or VIII) These courses use the knowledge gained in E-Waste & Environmental Management as a foundation for advanced study in environmental protection, sustainability, and resource management.
Q.3	3a	List all the Course Outcomes (COs) of this course and mention which CO you find most useful.
		vThe Course Outcomes (COs) of E-Waste & Environmental Management (VEC02) are: CO1: Understand the need and concept of e-waste management and recycling. CO2: Gain knowledge of legislative rules and regulations related to e-waste management. CO3: Recognize the tools and technologies required for e-waste recycling, assessment, and monitoring. CO4: Address contemporary issues and analyze the local and global impact of computing and engineering solutions on individuals, organizations, and society. CO5: Apply the knowledge of e-waste management in daily life to minimize environmental and health hazards. Among these, CO5 is the most useful because it enables me to apply the principles of e-waste management in my daily life, helping reduce environmental pollution, promote responsible disposal of electronic waste, and contribute to sustainable development.
	3b	How are these COs mapped to the Program Outcomes (POs)?
		The Course Outcomes (COs) are mapped to the Program Outcomes (POs) with different correlation levels (e.g., 1/12, 2/12, 3/12) based on their contribution to knowledge, analysis, environmental sustainability, society, and modern engineering practices.
Q.4	4	Where do you see the applications of this course in real life and industry?
		The concepts of this course are applied in e-waste recycling industries, electronic waste collection and disposal, environmental monitoring, pollution control, green buildings, disaster management, and environmental compliance. They are also used by organizations working in sustainability and environmental protection.
Q.5	5a	Select one Top university outside India and mention the name of their similar

		course.
		Top University: IIT Kharagpur Similar Course: Electronic Waste Management – Issues and Challenges (available through NPTEL).
	5b	How does their curriculum compare with our course?
		The curriculum is similar as both courses focus on electronic waste management, recycling technologies, environmental sustainability, waste management regulations, and modern environmental practices.
Q.6	6a	How many lecture sessions are planned for this course?
		There are a total of 30 lecture teaching hours planned to cover the entire course modules.
	6b	List the suggested Textbooks, Reference books, E-books and Research papers related to the course. Are these resources available in our library? If yes, please mention their accession numbers.
		Textbook: Environmental Science by G. Tyler Miller Jr. & Scott Spoolman. Reference Books: Electronic Waste Management (Hester & Harrison), Electronic Waste (Fowler B.), E-waste: Implications, Regulations and Management in India (Johri R.), Environmental Management (Krishnamoorthy B.). E-Books: Electronic Waste Management Rules 2016 and Waste Electrical and Electronic Equipment (WEEE). Research Papers: Five research papers on e-waste management are recommended. Some textbooks are available in the library, but accession numbers are not mentioned in the AAP and should be checked in the library catalog.
	6c	What resources are currently uploaded on V-refer?
		The course curriculum assets, including the consolidated Academic Administration Plan and corresponding lecture guides, are uploaded on the platform.
	6d	What are the stipulated office hours of faculty for doubt solving sessions?
		The faculty is available for doubt-solving every Thursday from 4:00 PM to 5:00 PM in D101 (Faculty Room) for TE CMPN students.
Q.7	7a	What is the Evaluation Metric for this Theory Course i.e. What are the weightages for ISA, MSE and ESE?
		The theory course is evaluated through ISA only, carrying a total of 75 marks. MSE and ESE are not applicable (NA) for this course.
	7b	What does ISA comprise of?

		ISA comprises Class Participation, Online Game Quiz, Video Task, Carbon Footprint Calculator, Device Anatomy Activity, Class Test, Case Study, Data Analysis Activity, Sustainability Reel/Podcast, Green Hackathon, and Campus Sustainability Consultancy (E-Waste Audit & Awareness Campaign).
	7c	What is the evaluation rubric for ISA?
		ISA is evaluated through: Online Quiz, Video Task, Carbon Footprint Calculator, Device Anatomy, Class Test, Case Study, Data Analysis, Sustainability Reel/Podcast, Green Hackathon, and Campus Sustainability Consultancy (Total: 75 marks).
	7d	What are the dates of MSE for this course?
		MSE is not applicable (NA) for this course. Therefore, no MSE dates are scheduled.
	7e	What is the date of ESE for this course?
		The ESE date is not mentioned in the Academic Administration Plan. It will be announced separately by the institute/university examination timetable.
Q.8	8a	Is there an allied Practical Course?
		No.
	8b	If yes, how many credits does this Practical course have?
		Not Applicable (NA). There is no allied practical course, so no practical credits are assigned.
	8c	What is the Evaluation Metric for this allied Practical Course i.e. Weightages for ISA and ESE?
		Not Applicable (NA). There is no allied practical course, so no ISA or ESE evaluation is prescribed for practicals.
	8d	What are the dates of ESE exam for this allied Practical course?
		Not Applicable (NA). There is no allied practical course, so no practical ESE dates are scheduled.
Q. 9	9	What is the date of declaration of Result?
		The final results for the regular odd semester session are scheduled to be declared on Saturday, December 19, 2026.
Q.10	10	When does the next Academic Term Start?
		Jan 6th,2027.
